

Anton Egorov

AI Creative Technologist
Yerevan, Armenia
Remote / Relocation

Hard skills

AI GENERATION

- ComfyUI
- Nano Banana
- Flux
- Midjourney
- Recraft
- Kling
- ElevenLabs
- Suno

AUTOMATION

- Google Cloud Run
- Gemini API
- Make
- Claude
- Cursor
- ffmpeg
- Python (AI-assisted)
- Node.js (AI-assisted)

MOTION & 3D

- After Effects
- Premiere Pro
- Blender
- Marvelous Designer
- Substance Painter

DESIGN

- Figma
- Photoshop

Soft skills

- Bridging creative & tech
- Process audit & automation
- Rapid prototyping
- AI tool evaluation
- Explaining AI to non-tech teams
- Cross-functional collaboration

About

Designer working at the intersection of generative AI, motion/3D and creative automation.
I build pipelines that turn AI generation into a scalable production process — from prompts and ComfyUI workflows to batch generation and dev-ready assets.

Shipped video gifts, stickers, 3D icons and onboarding animations for a high-volume content product.

Experience

Senior CG Artist, Social Discovery Group

Jan 2025 - Oct 2026

- Designed an automated video-gift pipeline: Kling API + Gemini + ffmpeg, chroma key, webm/hevc export (Node.js)
- Built a photo-to-sticker pipeline: Make + Google Cloud Run + Gemini API
- Launched visual-novel generation on RunningHub: scripts, characters and illustrations generated automatically
- AI-generated video, imagery and sound for product UI
- 3D motion: animated gifts, icons, onboarding animations (Blender, After Effects)
- Set up the motion workflow: storyboard → generation → review → AE editing → revisions
- Prepared and optimized dev-ready assets for mobile, web and Figma

3D Motion Designer, Social Discovery Group

Mar 2024 - Dec 2024

- Promo videos for multiple platforms in After Effects
- 3D animation in Blender, AI-generated imagery and video

Freelance

Nov 2022 - Mar 2024

- 3D and motion design for brands and digital platforms
- Social media promo content and infographics
- Adopted new 3D tools into production

3D Modeller, Comme Des Creators

May 2020 - Nov 2022

- 3D clothing modelling
- 3D animation
- OpenGL-based renders: modelling, texturing, asset integration
