

Anton Egorov

AI Creative Technologist
Yerevan, Armenia
Remote / Relocation

Hard skills

AI GENERATION

- ComfyUI
- Nano Banana
- Flux
- Midjourney
- Recraft
- Kling
- ElevenLabs
- Suno

AUTOMATION

- Google Cloud Run
- Gemini API
- Make
- Claude
- Cursor
- ffmpeg
- Python (AI-assisted)
- Node.js (AI-assisted)

MOTION & 3D

- After Effects
- Premiere Pro
- Blender
- Marvelous Designer
- Substance Painter

DESIGN

- Figma
- Photoshop

Soft skills

- Bridging creative & tech
- Process audit & automation
- Rapid prototyping
- AI tool evaluation
- Explaining AI to non-tech teams
- Cross-functional collaboration

About

Designer working at the intersection of generative AI, motion/3D and creative automation.
I build pipelines from prompts and ComfyUI workflows to batch generation and dev-ready assets.

Shipped video gifts, stickers, 3D icons and onboarding animations for high-volume social discovery products, and automated the routine so the team could focus on design.

Experience

Senior CG Artist, Social Discovery Group

Jan 2025 - Oct 2026

- Designed an automated video-gift pipeline: Kling API + Gemini + ffmpeg, chroma key, alpha WebM/HEVC export (Node.js)
- Built a fully automated photo-to-sticker pipeline (Make + Google Cloud Run + Gemini API) that runs with no human in the loop
- Launched visual-novel generation on RunningHub: scripts, characters and illustrations generated automatically
- Created AI-generated video, imagery and sound for product UI
- Created 3D motion gifts, icons and onboarding animations (Blender, After Effects)
- Set up the motion workflow: storyboard → generation → review → After Effects editing → revisions
- Automated asset optimization and technical prep for mobile, web and Figma, so designers could focus on design

3D Motion Designer, Social Discovery Group

Mar 2024 - Dec 2024

- Produced promo videos for multiple platforms in After Effects
- Animated 3D scenes in Blender; generated imagery and video with AI

Freelance

Nov 2022 - Mar 2024

- Delivered 3D and motion design for brands and digital platforms
- Created social media promo content and infographics
- Adopted new 3D tools into production

3D Modeller, Comme Des Creators

May 2020 - Nov 2022

- Modelled 3D clothing and created 3D animation
- OpenGL-based renders: modelling, texturing, asset integration
